Briefcase Plus Crack +

Using Briefcase Plus, you can synchronize files between two computers, or between a desktop and a portable computer, or between a mobile phone and a computer. Features: The use of the briefcase feature is quite simple. You start the application, which starts a web server on your computer. If you choose to use a briefcase, you must open the briefcase, which will start a web server. Thereafter, all files in the briefcase are loaded and synchronised between the two computers, or between the desktop and the portable, or between the phone and the computer. Using the collection of files in the briefcase, you can work on the first computer, and then go to the second computer, or the other computer, and work again on your files, which are in the briefcase. The transfer of the files can be manual, or automatic. Manual transfer: When you have set up the transfer to be automatic, you will be able to initiate the transfer of the files from the first computer, to the second, or any other computer, from the briefcase. You can set a period to initiate the automatic transfer. During the time period, files are automatically copied to the second computer, or the other computer, which can be the same computer, or a different computer. To synchronise a specific folder, you can select the folder, and then select it from the list of folders, which are in the briefcase. You can also specify what to do with the files, whether to simply update the files, or to delete them from the original computer. Automatic transfer: When you start the application, and it starts a web server, it will check whether the briefcase is loaded. If not, it will check whether the file server and the collection of files are synchronized, if not it will sync them. During the transfer, the transfer will start after a specified time. You can specify the start time of the transfer, or whether it should be started when you have completed the task, or when the computer is idle. There is also a possibility to deactivate the transfer when you are working with the computer. The briefcase can hold: In the briefcase you can work on files from the collection of files, and when you have finished, you can synchronize your files, or you can synchronize some files, and remove the files you have not synchronized. The purpose of the collection of files in

What's New in the?

· Two-way synchronization between two folders. · Compresses the content of the briefcase. The size of the briefcase will decrease by up to 50%. · File size limit: 500MB per file. · Loading a new file in a briefcase automatically updates the recent changes history of that file. · Saves the history of recently used files. If you choose to store them in a file, Briefcase Plus will use it. · Synchronizes folders and subfolders (including hidden and system files) with two-way synchronization. · Set the time interval in which the synchronization will be performed. If you want to perform a synchronize every hour, you can set it to (1,0,0), for example. · You can load a briefcase on one computer, and synchronize it on another computer. · Automatic (or manual) backup and restore of the briefcase (on the same computer). · You can load a briefcase on one computer and restore the briefcase on another computer. · You can load an empty briefcase on one computer, and synchronize it on another computer. · You can load a blank briefcase on one computer, and synchronize it on another computer. · Drag and drop files directly on a briefcase, which will synchronize them. This works both for folders and subfolders. · One instance of Briefcase Plus runs on a computer in the background. You can add one or several synchronizations (which are counted as separate instances of Briefcase Plus). · Open a briefcase on one computer, and drag a file on another computer (or use the standard Drag and Drop with right click menu), which will synchronize the two files. · Open the Briefcase on one computer, and you will see a list of recent changes. If a file has been modified on the second computer, you will see that the file has been synchronized. · The context menu contains functions to restore and create new synchronizations. · Switch to the file manager if the contents of the briefcase do not fit in the screen. · Use the context menu to edit the context menu entries. · Deactivate the operation of Briefcase Plus by pressing the Esc key. Screenshots: · Synchronize a folder on two computers. · You can also use the contextual menu to synchronize folders and subfolders. · Two computers. &middot
